

What is SkinPen?

SkinPen is collagen induction therapy, or microneedling. It comfortably creates micro-injuries in the skin to trigger the body's natural healing process which results in skin remodeling and the development of collagen and elastin. Collagen and elastin are the two proteins that are responsible for skin structure.

What does SkinPen treat?

SkinPen treats fine lines, wrinkles, large pores, scars (including acne scars) and uneven skin texture.

What is the experience like?

During the procedure, you will first have numbing cream applied and you will numb for 10-15 minutes. Then your provider will apply a gel to your face and run the SkinPen back and forth over your skin. There may be minor discomfort but most patients tolerate the procedure very well.

How many treatments do I need?

You will have a minimum of 3 treatments spaced 4 weeks apart.

Maximum benefit will be noted at 6 months.

Single SkinPen Treatment \$250

3 SkinPen Treatments for \$500

***An additional \$200 for 3 neck treatments when purchasing face**

Post procedure we recommend TNS Recovery Complex , Elta PM, and Elta Clear
